Bachelor of Science—Accountancy

Faculty: Ahlawat, Chiang, Domingo, Hughes, Miller, Nouri, Shahid

The Bachelor of Science—Accountancy program prepares students for careers in public, corporate, not-for-profit, and governmental accounting. Accounting courses integrate the study of the theory and current practice of accounting with research and computer applications. There are a chapter of Beta Alpha Psi (national honors organization), a student chapter of the Institute of Management Accountants, and the National Association of Black Accountants. All three sponsor career-planning and other co-curricular activities.

Requirements for the Major

Students are required to take 32 ½ course units (=130 credits) to graduate with an accounting degree. Ten of these course units are in accounting. For students interested in the Certified Public Accountant’s (CPA) license, a Bachelor of Science in Accountancy qualifies students to take the CPA exam in the state of New Jersey. However, to qualify for a CPA license, students need to take an additional five course units (=20 credits) to satisfy the state-mandated 150-hour requirement. For this, a minor in one of the following areas is recommended: communication studies, psychology, computer science, international studies, criminology, and language minor.

The accountancy program, in addition to its major courses, requires all students to take a set of business and correlate courses. Furthermore, certain courses in the social sciences and history, and natural sciences and quantitative reasoning, in the liberal learning component of the curriculum, are specified.

The required course units for a degree in accounting are as follows:

- ECO 101, ECO 102
- ACC 201, ACC 211
- MAT 125 or MAT 127, STA 215, and ECO 231
- BUS 200
- FIN 201, MGT 201, MIT 201, MKT 201 (.5 course units each)
- ACC 301, ACC 302, ACC 311, ACC 321, ACC 401, ACC 411, ACC 421, and ACC 498
- FIN 300-level (not an independent study and by advisement), or FIN 430
- MGT 360 OR MKT 360
- MGT 499

Program Entrance, Retention, and Exit Standards

Every major and specialization program at the College has set standards for allowing students to remain in that program, to transfer within the College from one program to another, and to graduate from a program.

Students are strongly discouraged from requesting changes of major or specialization after their junior year. Change of majors or specialization after the junior year will be
Bachelor of Science—Accountancy

processed by the School of Business, but students are not guaranteed that completion of the remaining requirements in the new major or specialization may be accomplished within their remaining two semesters. Students are encouraged to consult with faculty advisors and with the assistant dean for student services prior to requesting a change of major or specialization.

The following are the standards for the Accountancy program. Minimum grades are noted in parentheses.

- Retention in the program is based on the performance in 100-level College Math course (C)—preferably MAT 125/Calculus for Business and Social Sciences (C) or MAT 127/Calculus A (C), and performance in these “critical content” course: ACC201/Financial Accounting (B); ACC 211/Fundamentals of Accounting(C).
- Transfer into the program from another program within the College is competitive and based in part upon the following performance standards in these “foundation courses”: MAT 125/Calculus for Business and the Social Sciences (C) or MAT 127/Calculus A (C).
- Graduation requires a GPA of 2.0 in courses for the program.

Minor in Accountancy

Students can choose from two tracks: (a) financial and (b) managerial. The minor requires five courses, as follows:

Note: Students with majors in the BS in Economics and Business Administration interested in a minor in accountancy will need to take an additional accounting course of their choice.
