Computer Science

Faculty: Pulimood Chair; Knox, Li, Papanichail, Salgian, Tao,
Faculty from mathematics with joint teaching appointments in Computer Science: Conjura

The computer science curriculum is designed to prepare students for employment as computer science professionals, as well as to provide a strong background for advanced study. The BS in Computer Science program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. All students take courses in problem solving and programming fundamentals, data structures, computer architecture, operating systems, algorithm analysis, software engineering, and programming languages or theory of computation. Upper-level options support an in-depth exploration of a range of subdisciplines including, but not limited to, artificial intelligence, database systems, graphics, networks, security, computational biology, and human computer interaction. Special topics courses offered each semester provide the opportunity to study and work with the latest trends in technology. For their capstone experiences students participate in research and/or industry experiences which culminate in professional presentations. Students enhance their studies with course work in mathematics and science, as well as in arts, humanities, history, and other disciplines in social sciences. A minimum of 32 course units is required for graduation.

The Department of Computer Science encourages its students to consider studying abroad for a semester as part of their curriculum. TCNJ students who study abroad, participate in global student teaching, pursue international internships, or go on exchange at colleges and universities in the U.S. can do so usually at a cost comparable to a semester spent at TCNJ. For more information about studying outside the United States without delaying graduation, academic advisors should be consulted. Further details are available from the College’s Center for Global Engagement.

Requirements for the major:

I. Computer Science Courses

<table>
<thead>
<tr>
<th>Required Seminar Courses</th>
<th>12.5 course units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required Introductory Core Computer Science Courses</td>
<td></td>
</tr>
<tr>
<td>CSC 220/CS I: Computational Problem Solving*</td>
<td>1 course unit</td>
</tr>
<tr>
<td>CSC 230/CS II: Data Structures*</td>
<td>1 course unit</td>
</tr>
<tr>
<td>CSC 270/Discrete Structures</td>
<td>1 course unit</td>
</tr>
</tbody>
</table>

* A student who completed CSC 250 prior to transferring to the major and wishes to use this course to meet the CSC 220 and CSC 230 requirement must successfully complete an entrance test in C++. If the substitution is approved, the student must take an additional CS Option course to meet the Computer Science major requirements.

Required Capstone Requirement
CSC 399/Internship

or
CSC 498/Mentored Research I in Computer Science

1 course unit

Computer Science Options
Select three (or four*) courses from the following list**:
- CSC 307/Data Mining and Predictive Modeling
- CSC 315/Database Systems
- CSC 320/Information Retrieval
- CSC 350/Computer Graphics
- CSC 360/Computer Networking
- CSC 380/Artificial Intelligence
- CSC 425/Compilers and Interpreters
- CSC 435/Programming Languages
- CSC 445/Theory of Computation
- CSC 450/Computer and Network Security
- CSC 470/Topics in Computer Science
- CSC 471/Genomics and Bioinformatics

* A student who completed CSC 250 prior to transferring to the major and wishes to use this course to meet the CSC 220 and CSC 230 requirement must successfully complete an entrance test in C++. If the substitution is approved, the student must take an additional CS Option course to meet the Computer Science major requirements.

** The list of Computer Science Options courses offered may change depending on availability of faculty and current trends in the computer science.

One additional capstone course or independent study from the following list may be chosen, with advisement and departmental approval, and applied towards the Computer Science Options.

Capstone Courses and Independent Study
- CSC 399/Internship in Computer Science
- CSC 498/Mentored Research I in Computer Science
- CSC 499/Mentored Research II in Computer Science
- CSC 391/Independent Study in Computer Science

Students may take additional Computer Science Options courses, including capstone courses and independent study, for free elective credit with the exception that placement out of WRI 102 or foreign language must be replaced by liberal learning courses, not CSC courses.

II. Required Mathematics Courses
3 course units
- MAT 127/Calculus A
- MAT 128/Calculus B or MAT 205/Linear Algebra
- STA 215/Statistical Inference

III. Computer Science Natural Sciences and Mathematics Options
4 course units
Three major-level laboratory sciences and one additional math or science course, with advisement. Consult the department for details.
IV. Foreign Language Requirements

Two courses in sequence in any of the modern languages are required if students opt for a language not previously studied in high school or another institution.

Alternatively, students continuing a foreign language previously taken in high school or at another institution must take three courses of that language in sequence. However, this requirement may be reduced by taking a placement test in that language. Based on the student’s performance on that test, 0, 1, 2, or 3 courses may be required.

Any course reduction in foreign language requirements results in an equivalent number of free elective courses, which must be selected from the areas of art, humanities, social science or history. Consult the department for details.

Note: Arabic 151 and 152; Chinese 151 and 152; Japanese 151 and 152; and Russian 151 and 152 are one semester intensive courses and carry two course units of credit each. Students should take this into account when planning a normal four-course semester.

Program Entrance, Retention, and Exit Standards

Every major program at the College has set standards for allowing students to remain in that program, to transfer within the College from one program to another, and to graduate from a program. The following are the standards for the computer science program. Minimum grades are noted in parentheses.

- Students must successfully complete the Introductory Core and Calculus A before taking courses in the Advanced Core or CS Options. Successful completion is indicated by a grade of C or higher in each of these courses:
  (i) CSC 220*/Computer Science I: Computational Problem Solving (C)
  (ii) CSC 230*/Computer Science II: Data Structures (C)
  (iii) CSC 270/Discrete Structures (C)
  (iv) MAT 127/Calculus A (C).

- Retention in the program is based on making adequate progress towards meeting the requirements of the major, and the following minimum performance standards in these “critical content courses”:
  (i) overall GPA of 2.0 higher
  (ii) CSC 220*/Computer Science I: Computational Problem Solving (C)
  (iii) CSC 230*/Computer Science II: Data Structures (C)
  (iv) CSC 270/Discrete Structures (C)
  (v) CSC 335/Analysis of Algorithms (C)
  (vi) MAT 127/Calculus A (C).

- For transfer into the program from another program within the College, students are required to meet the following minimum performance standards:
  (i) overall GPA of 2.0 higher
  (ii) CSC 220/Computer Science I: Computational Problem Solving (C) and
  (iii) MAT 127/Calculus A (C).

- Graduation requires a minimum GPA of 2.0 in computer science courses, minimum GPA of 2.0 overall, and the following minimum performance standards in these “critical content courses”:
  (i) overall GPA of 2.0 higher
  (ii) CSC 220*/Computer Science I: Computational Problem Solving (C)
  (iii) CSC 230*/Computer Science II: Data Structures (C)
Computer Science Minor 5 course units

I. Required Courses (four course units)

1. CSC 220*/CS I: Computational Problem Solving 1 course unit
2. CSC 230*/CS II: Data Structures 1 course unit
3. CSC 270/Discrete Structures of Computer Science 1 course unit
4. CSC 415/Software Engineering 1 course unit

II. Options for Computer Science Minor (one or two* course units)

One advanced computer science course (300 or 400 level), with the approval of the department.

* A student who has taken CSC 250 prior to adding the Computer Science minor and wishes to use this course to meet the CSC 220 and CSC 230 requirement must successfully complete an entrance test in C++. If the substitution is approved, the student must take an additional CS Option course to meet the Computer Science minor requirements.

Minimum grade point average for retention and completion for the minor is based on the following minimum performance standards in these “critical content courses”:

- (i) CSC 220*/Computer Science I: Computational Problem Solving (C);
- (ii) CSC 230*/Computer Science II: Data Structures (C);
- (iii) CSC 270/Discrete Structures of Computer Science (C);
- (iv) CSC 415/Software Engineering (C);
- (v) Minimum GPA of 2.0 in computer science courses.

Department Academic Regulations

A minimum of 6 course units in the major must be earned in the department. A minimum of 4 course units of the final 6 in the major must be earned in the department.

CSC 101, CSC 102, CSC 104, CSC 105, CSC 215, HON 280, CSC 365 and CSC 465 do not count toward the required or options courses in the computer science major or minor. These courses may be taken by computer science majors only if they fulfill requirements / required options for other majors or as free electives with permission of the department.
Suggested Course Sequence

First-Year

**Fall**
- CSC 099/Orientation to Computer Science 0 course unit
- CSC 220/CS I: Computational Problem Solving 1 course unit
- MAT 127/Calculus A 1 course unit
- FSP First Seminar 1 course unit
- Liberal Learning (Foreign Language suggested)* 1 course unit

*Note: Arabic 151 and 152, Chinese 151 and 152, Japanese 151 and 152, and Russian 151 and 152 (offered annually); are intensive courses and carry two course units of credit each. Students should take this into account when planning a normal four-course semester.

**Spring**
- CSC 230/CS II: Data Structures 1 course unit
- CSC 270/Discrete Structures 1 course unit
- MAT 128/Calculus B or MAT 205/Linear Algebra 1 course unit
- MAT 205/Linear Algebra or WRI 102/Academic Writing (if not exempted) 1 course unit
- Liberal Learning (Foreign Language suggested)* 1 course unit

*Note: Arabic 151 and 152, Chinese 151 and 152, Japanese 151 and 152, and Russian 151 and 152 are intensive courses and carry two course units of credit each. Students should take this into account when planning a normal four-course semester.

**Total** 8 course units

Second-Year

- CSC 199/CS Professional Development Seminar 0.25 course unit
- CSC 325/Computer Architecture 1 course unit
- CSC 335/Analysis of Algorithms 1 course unit
- CSC 345/Operating Systems 1 course unit
- CSC Option Course 1 course unit
- MAT 128/Calculus B or MAT 205/Linear Algebra (if WRI 102 was not exempted) 1 course unit
- Free Elective (CSC 105 suggested for free elective credit) 1 course unit
- STA 215/Statistical Inference 1 course unit
- Natural Sciences (major-level; with lab) 1 course unit
- Liberal Learning (Foreign Language suggested) 1 course unit

**Total** 8.25 course units

Third-Year (for majors intending to apply for jobs in the industry)

- CSC 299/Junior Seminar in Computer Science 0.25 course unit
- CSC Option Course 1 course unit
- CSC 415/Software Engineering 1 course unit
- CSC Option Course 1 course unit
- Natural Sciences (major-level; with lab) 2 course units
- Liberal Learning 2 course units
- Free Elective 1 course unit

**Total** 8.25 course units
### Third-Year (for majors intending to apply for graduate school)
