

School of Science

Jeffrey M. Osborn, Dean; Patricia Van Hise, Assistant Dean

The School of Science provides a high quality and challenging education for exceptional undergraduate students, offering studies in the sciences as well as interdisciplinary fields. Students interact with outstanding teacher-scholars as instructors, advisors, and mentors, and have access to modern, well-equipped facilities for hands-on experiences. Faculty members integrate comprehensive undergraduate research experiences into their scholarship, actively preparing students to meet future career or graduate school goals. An array of support programs is designed to provide any student with a desire to study in the School of Science the opportunity to succeed. The liberal arts setting of the College and the balance of theory and practice in the School prepare each student for lifelong learning and for contributing to the field and to society at large.

The School of Science is dedicated to providing students with an outstanding education in biology, chemistry, computer science, mathematics and statistics, and physics that emphasizes the excitement of scientific exploration and the importance of science to society. Through coursework, independent study, faculty mentored research, and internships, the School aims to foster a deep understanding of the concepts and processes of science. The School of Science is also dedicated to producing exemplary science and math teachers in collaboration with TCNJ's School of Education through elementary education programs and our secondary education programs in biology, chemistry, physics, and mathematics. One of the opportunities available to students pursuing a degree in the School of Science is to study abroad for a semester or a year. Any student interested in studying abroad should meet with his/her faculty advisor early in his/her college career to develop an academic plan (or discuss possibilities and responsibilities). Students in the School of Science can expect to go on to rewarding careers in a wide variety of fields, including graduate study, professional schools, teaching, high-technology industry, public service, media, or any other area in which a strong science background is important.

The five departments of the School of Science are located in adjacent buildings next to Lake Ceva: the Science Complex (chemistry, mathematics and statistics, and physics), the Biology Building (biology), and Forcina Hall (computer science). The Science Complex and the Biology Building are recently constructed facilities, and they, along with Forcina Hall, are equipped with modern tools of science and science education, including a planetarium, astronomical observatory, optics laboratory, nuclear magnetic resonance laboratory, X-ray diffractometer laboratory, spectroscopy and chromatography suite, molecular modeling suite, electron microscopy suite, molecular biology laboratory, greenhouse, Sun/Solaris computing laboratory, Intel/Linux computing laboratory, mathematics education laboratory, and numerous computer classrooms. Individual faculty laboratories are designed to allow intensive interaction among students and faculty in an undergraduate-focused research environment.

The School of Science Office is located in the Science Complex, room P-105. The assistant dean is Patricia Van Hise, who can be reached at 609-771-3472. The secretary to the dean is Monica Zrada. You may contact the Office of the Dean at 609-771-2724.
