African Studies

Sponsors: C. Fisher (History), P. Kendrix-Williams (African American Studies/English), M. Sow (World Languages and Cultures/African American Studies), K. Pearson (Interactive Multimedia/English)

The interdisciplinary concentration in African World Studies focuses on the history and culture of the African continent and of people of African descent throughout the world. Because of the enormous breadth of this subject African World Studies has three distinct emphases: African Studies, Diaspora Studies, and African American Studies.

The African Studies Concentration focuses on the history and culture of the myriad ethnic, linguistic, socio-political, and religious groups of the African continent. In-depth examinations of African life before and after the slave trades, and during and after European colonial domination, help students understand the role that Africa has played in ancient, medieval, and contemporary global history. American and European economic and political interactions with African indigenous culture, history, and popular culture are explored.

Option B Alternatives

The interdisciplinary concentration in African Studies focuses on the history and culture of the African continent and of people of African descent throughout the world. Through careful advisement, using the Option B mechanism—or a combination of Options A and B, students may also complete additional emphases, including, but not limited to: *Caribbean Studies, Francophone Studies, Africana Herstory, and/or Race, Justice and Equality.*

Courses and Requirements

The interdisciplinary concentration in African Studies requires a total of six courses from the lists below plus one approved course in laboratory science and one in quantitative reasoning. Each emphasis requires some core courses plus others as specified. *First Seminars* may count toward completion of this concentration if their subject matter is appropriate. Students must consult with faculty sponsors to determine whether their first

year seminars can be so applied, and to obtain written permission to do so. Courses listed in the following emphases do *not* have prerequisites unless specified.

African Studies Emphasis

Core Courses (*three of the following*)

Arts and Humanities

- AAS 201/African and Diaspora Religions

Social Sciences and History (*one of the following*)

- AAS 280/Women of African Descent in Global Perspective
- HIS 351/Ancient and Medieval Africa (same as HIS 351)
- HIS 352/Colonial and Modern Africa (same as HIS 352)
- HIS 353/African History in Film, Literature, and Music

Arts and Humanities Courses (*one of the following*)

- AAS 201/African and Diaspora Religions
- AAS 346/African Art History
- AAS 365/African Cinema: Francophone African Experience through Film

Additional Courses (*three of the following, making sure that all together there are at least two from Arts and Humanities and two from Social Science and History*)

Arts and Humanities

- AAS 201/African and Diaspora Religions
- AAS 346/African Art History
- AAS 365/African Cinema: Francophone African Experience through Film
- AAS 428/Writings of WEB DuBois

Social Science and History

- AAS 280/Women of African Descent in Global Perspective
- HIS 153/Imagining Africa
- HIS 354/South African History
- HIS 355/East African History
- HIS 351/Ancient and Medieval Africa
- HIS 352/Colonial and Modern Africa
- HIS 356/State and Slavery in West Africa
- HIS 357/Religion and Politics in Africa

African Diaspora Studies

Sponsors: C. Fisher (History), P. Kendrix-Williams (African American Studies/English), M. Sow (World Languages and Cultures/African American Studies), K. Pearson (Interactive Multimedia/English)

Interdisciplinary concentrations in African World Studies focus on the history and culture of the African continent and of people of African descent throughout the world. Because of the enormous breadth of this subject African World Studies has three distinct concentrations: African Studies, Diaspora African Studies, and African American Studies.

The African Diaspora Studies Concentration explores the history and culture of persons of African descent living outside the African continent. The migration of Africans before the Arab or trans-Atlantic slave trade, and the experiences of those communities, is studied in concert with narratives of Asian, Middle Eastern, European, North and South American, and Caribbean communities that evolved since the 15th Century. Particular attention is placed on the Diaspora's African religious and socio-cultural retentions, resistance and liberation movements, and the interplay of issues of race, class, and gender. Similarities of worldwide stereotypic depictions of Africana people and corresponding constructions of identity that challenge the stereotypes are also examined.

Option B Alternatives

The interdisciplinary concentration in African Diaspora Studies focuses on the history and culture of the African continent and of people of African descent throughout the world. Through careful advisement, using the Option B mechanism-or a combination of Options A and B, students may also complete additional emphases, including, but not limited to: **Caribbean Studies, Francophone Studies, Africana Herstory, and/or Race, Justice and Equality.**

Courses and Requirements

The interdisciplinary concentration in African Diaspora Studies requires a total of six courses from the lists below plus one approved course in laboratory science and one in quantitative reasoning. Each emphasis requires some core courses plus others as specified. *First Seminars* may count toward completion of this concentration if their subject matter is appropriate. Students must consult with faculty sponsors to determine whether their first year seminars can be so applied, and to obtain written permission to do so. Courses listed in the following emphases do *not* have prerequisites unless specified.

Core Courses (*two of the following*)

Arts and Humanities

- AAS 179/African and Diaspora Religions
- AAS 180/Caribbean Women Writers (same as LIT 335)

Social Sciences and History

- AAS 280/Africana Women in Historical Perspective

History Courses (*two of the following*)

- AAS 205/African American History to 1865
- AAS 206/African American History Since 1865
- AAS 311/Great Lives in Caribbean History
- HIS 153/Imagining Africa
- HIS 356/State and Slavery in West Africa
- HIS 357/Religion and Politics in Africa
- HIS 351/Ancient and Medieval Africa
- HIS 352/Colonial and Modern Africa
- HIS 356/State and Slavery in West Africa

Arts or Humanities Courses (*one of the following*)

- AAS 201/African and Diaspora Religions
- AAS 235/African-American Film
- AAS 240/History of Jazz
- AAS 251/Harlem Renaissance When in Vogue
- AAS 280/Women of African Descent in Global Perspective
- AAS 335/Caribbean Women Writers (same as LIT 335)
- AAS 346/African Art History
- AAS 365/African Cinema: Francophone African Experience through Film
- AAS 428/Writings of WEB DuBois
- JPW 321/AAS 321 Race, Gender, and the News
- WGS 360/Literature by Latinas and Latin American Women

Social Science or History Courses (*one of the following*)

- AAS 179/African American History to 1865
- AAS 180/African American History Since 1865
- AAS 375/WGS 365/Womanist Thought (prerequisite: AAS 280/WGS 260/Women of African Descent in Global Perspective, or WGS 375/Global Feminisms)
- AAS 376/HIS 365/WGS 361/African American Women's History
- HIS 351/Ancient and Medieval Africa
- HIS 352/Colonial and Modern Africa
- HIS 354/South African History
- HIS 355/East African History
- HIS 356/State and Slavery in West Africa
- HIS 357/Religion and Politics in Africa

African American Studies

Sponsors: C. Fisher (History), P. Kendrix-Williams (African American Studies/English), M. Sow (World Languages and Cultures/African American Studies), K. Pearson (Interactive Multimedia/English)

Interdisciplinary concentrations in African World Studies focus on the history and culture of the African continent and of people of African descent throughout the world. Because of the enormous breadth of this subject African World Studies has three distinct concentrations: African Studies, Diaspora African Studies, and African American Studies.

The African American Studies Concentration examines contributions of men and women of African descent to the independence movement, economic growth, jurisprudence, military initiatives, arts, literature, and culture of the United States. The importance of discussions of race, justice, equality, gender, and class to an understanding of American and global history are examined through detailed study of black contributions, constructions of identity, and liberation struggles led by persons of African descent. Students who elect this emphasis have the option of focusing on literature produced by persons of African descent living in the United States. This includes attention to oral traditions of the USA and their African antecedents as well as to writings of ante-bellum and post-bellum citizens. How African Americans used literary forms as tools to encourage freedom, justice, and equity; ways race gender and class influenced those works; and the artistic traditions of African American communities are all examined.

Option B Alternatives

The interdisciplinary concentration in African American Studies focuses on the history and culture of the African continent and of people of African descent throughout the world. Through careful advisement, using the Option B mechanism—or a combination of Options A and B, students may also complete additional emphases, including, but not limited to: *Caribbean Studies*, *Francophone Studies*, *Africana Herstory*, and/or *Race, Justice and Equality*.

Asian Studies

Sponsors: Q. Shao (History), Coordinator, J. Gross (History), D. Hutton (Art), R. Kovalev (History), R. Li (Sociology), J. Mi (Modern Languages/English), L. Xinru (History)

The Asian Studies concentration focuses on socio-cultural-political aspects and different historical time periods of Asian societies, thus enabling students to gain crucial understandings of the aesthetics, history, and cultures of Asian societies. Courses in religions and philosophies of Asia increase students' awareness of the diverse cultural frameworks and literary, artistic, architectural, and other forms through which religious belief has been expressed in various regions of Asia. Courses in social science and history facilitate nuanced knowledge of Asian cultures and societies from an interdisciplinary perspective and help students critically engage various analytic skills and interpretative methodologies in the study of Asia.

Students are drawn into an area of study with which they may be unfamiliar. It will deepen their understanding of Asian cultures and engender the cultivation of life-long interests that will be conducive to more varied social interactions and leadership opportunities. Specific educational goals of the program include providing students with: a basic knowledge of one or more Asian cultures from an interdisciplinary approach; an introductory-level familiarity with an Asian language of their choosing; and a first-hand experience of studying or working in that linguistic culture through overseas studies or other channels.

Curriculum

Students take six courses, drawn from three disciplines, chosen from an approved list (see below), or by advisement. Students are strongly encouraged to work with their advisors to develop a coherent focus as they fulfill the program's requirements. Unless prerequisites are indicated, courses have no prerequisites.

Asian Language (*one course at the 102-level in Chinese, Japanese, Russian, or other Asian language, or equivalent proficiency*)

Arts and Humanities (*two courses: students may choose from any of the following but are encouraged to take one course from each category*)

Asian Religious Cultures and Philosophy

- REL 111/Buddhism and Buddhist Thought

- REL 112/Hinduism and Hindu Thought
- REL 113/Islam and Islamic Thought

Literary and Visual Cultures of Asia

- AAH 210/Arts of South Asia
- AAH 211/Arts of East Asia
- AAH 212/Arts of the Islamic World

NOTE: Courses listed below are seminars and topics courses that qualify for Asian studies by virtue of their particular subject matter. Not all classes with the listed numbers may be used for the Asian Studies. Please check with an Asian Studies faculty sponsor before enrolling in a topics course.

- **AAH 310 Early Modern Asian Art**
- **AAH 312 Arts of Iran**
- **AAH 415 Photography in India**
- MDL 371/New Chinese Cinema: Gender, National Identity and post-Socialist Ideology (under development)
- MDL 371/Undergraduate Seminar on Contemporary Chinese Culture
- LIT 370/Virtual Tibet: Cool Spirituality in an Age of Popular Culture (under development)

- HIS 498/The City in Modern China
- HIS 498/Political Protest in Twentieth-century China

Concentration Elective

Students must choose one additional course from those listed above or one additional course in an Asian language. Substitutions may be made by advisement.

Additional Qualifications

Three of the six courses must be at the 300 level or above. Other relevant courses may be substituted in each of these categories with the permission of a faculty sponsor. *First Seminars* may also count toward completion of this concentration if their subject matter is appropriate. Students must consult with faculty sponsors to determine whether their *First Seminars* can be applied to the Asian Studies Concentration.

In addition to courses required by this concentration, a student must complete one approved course in quantitative reasoning and one approved course in laboratory science to satisfy breadth requirements in liberal learning. Students should consult their major or open option advisors about how best to complete other liberal learning requirements.

Caribbean Studies

Faculty Sponsors: R. Adler (Anthropology), D. Bates (Sociology), A. Figueroa (World Languages and Cultures), C. Fisher (History), J. Gray (Women's & Gender Studies), P. Kendrix-Williams (African American Studies/English), J. Landreau (World Languages and Cultures/Women's & Gender Studies), L. McCauley (English), L. Ortiz-Vilarelle (English), S. Ryan (Communication Studies), T. San Pedro (World Languages and Cultures), M. Sow (African American Studies/World Languages and Cultures)

The purpose of the Concentration in Caribbean Studies is to provide students with the opportunity to study and do research on the cultures and societies of the Caribbean from a wide array of disciplinary and interdisciplinary perspectives that include African American studies, anthropology, communications, economics, history, international business, international studies, literature, political science, sociology, and women's and gender studies. Although we are very much aware of the current debates about "the Caribbean" as a geographical, political, cultural or analytical category, for our immediate purposes we define the region to include the English, French, Dutch and Spanish-speaking islands, as well as the South American states on the Caribbean littoral, and the Central American nations that share a Caribbean heritage.

The value of this concentration is twofold. First, we have on our campus many students from the Caribbean, or who are of Caribbean descent, or who are simply interested in Caribbean culture and history. Thus, the concentration responds to significant student interest. Second, we see the need for heightened awareness of the role of Caribbean countries in Western Hemisphere relations in general, and the United States in particular and thus view this concentration as a core piece of the international studies program at the College.

Curriculum

Courses marked with an * must be taken under advisement to determine whether the particular section of the course will incorporate a significant element of Caribbean Studies into its purview. Independent Studies and Topics course will also be taken under advisement. For all advising questions, please consult Dr. John Landreau at landreau@tcnj.edu or at 609-771-3361.

Students should consult their major or open option advisors about how best to complete other liberal learning requirements.

Classical and Early Modern British Literary Studies

Faculty Sponsor: H. Haynes (English)

The Interdisciplinary Concentration in Classical and Early Modern British Literary Studies is one of several interdisciplinary concentrations in Comparative Literary Studies. Through the systematic comparison of literary works from more than one culture or era, students of comparative literature develop a sophisticated understanding of what literature is and how it is culturally, politically, philosophically, and sociologically defined and influenced, exploring, from a cross-cultural and interdisciplinary perspective, how and why literary texts are categorized (in terms of traditions, periods, genres and movements). Students who study comparative literature can employ the skills and information learned in their courses to supplement and further their careers in a wide

range of fields, including education, law, creative writing, international business, marketing, librarianship, editing, technical writing, publishing, communications, translation, history, international studies, literature, and philosophy.

Rationale for Concentration in Classical and Early Modern British Literary Studies

British writers of the Early Modern era saw themselves as participants in a *renaissance* of Classical learning and aesthetics (hence the traditional name of “Renaissance” for the period). A comparative examination of Early Modern British literature in the context of its Classical precursors offers an opportunity to see both what the British “Renaissance” owed to the ancient world and how it differed from that source and model.

Curriculum (*six courses as indicated below*)

Classical Studies

Sponsors: Coordinator: H. Haynes (Classical Studies); *Faculty* C. Chazelle (History), J. Karras (History), L. Riccardi (Art), G. Steinberg (English)

The Interdisciplinary Concentration in Classical Studies aims to familiarize students with the rich cultural heritage of the ancient Greeks and Romans, including their languages, material culture (e.g., art history and archaeology), history (political, social, economic, and intellectual), philosophy, science, literature, and mythology, as well as the classical tradition from the Middle Ages to the present. Through courses in ancient languages, for example, students gain a mastery of the basic elements of grammar and syntax in Latin or Greek and read classical authors in their original languages. Through courses in classical culture, students gain skills and perspectives from analysis, criticism, and research in ancient art, history, literature, and philosophy that will enhance their ability to think clearly, to write well, and to find, analyze, evaluate, and present facts and ideas effectively. Students of Classical Studies also learn to read ancient documents and view ancient artifacts with a critical appreciation of their history, meaning, and significance, as they develop a sensitivity to their concrete historicity (as opposed to viewing them as timeless museum pieces), to their social and political importance, and to their role in the historical development of classical traditions over time—at the same time as they interrogate the very construction of a classical idea (or ideal) by examining the reception of the classical tradition in modern society.

Curriculum

Ancient Language (*one course from*)

- GRE 201/Intermediate Greek (prerequisites: GRE 101, GRE 102 or placement); or,
- LAT 201/Intermediate Latin (prerequisites: LAT 101, LAT 102, or placement) or the equivalent.

NOTE: Since reading competence in Greek or Latin is essential for this concentration, students who are not able to enroll these courses by placement will need to complete one or more prerequisites. Students who place out of GRE 101 and GRE 102 or LAT 101 and 102 are required to take one additional course from the lists below.

Ancient History (*two courses from the following*)

- CLS 108/Late Antiquity
- CLS 111/Rome and the Barbarians in the Early Middle Ages
- CLS 301/Classical Greek Civilization
- CLS 302/Hellenistic World
- CLS 303/History of the Roman Republic
- CLS 304/History of the Roman Empire
- CLS 305/Ancient Christianity

Ancient Art, Philosophy, or Literature (*two courses from among the following*)

- CLS 221/The Art of Greece
- CLS 222/The Art of Rome
- CLS 404/Women in Classical Art

- CLS 250/Introduction to Greek Mythology
- CLS 230/Classical Traditions
- CLS 325/Sex and Gender in Greco-Roman Antiquity
- CLS 326/Plato to Cable TV
- GRE 370/Special Topics in Classical Greek
- HON 349/Cities and Sanctuaries of Greece and Rome
- HON 351/An Odyssey in Greece
- LAT 310/The Age of Augustus
- LAT 315/Virgil and the Impact of Empire
- LAT 370/Special Topics in Latin
- CLS 201/History of Ancient Philosophy

Note: Students who place out of GRE 101 and GRE 102 or LAT 101 and 102 must take one additional course from list 2 or 3 above, or an approved *First Seminar*, or another approved course.

In addition to courses required by this concentration, a student must complete one approved course in quantitative reasoning and one approved course in laboratory science to satisfy breadth requirements in liberal learning. Students should consult their major or open option advisors about how best to complete other liberal learning requirements.

Cognitive Science

Sponsors: J. Erickson (Biology), P. Le Morvan (Philosophy, Religion, and Classical Studies), C. Preti (Philosophy, Religion, and Classical Studies), F. Steele (English)

Cognitive science is the empirical exploration of intelligent systems. It is, by its very nature, an interdisciplinary science combining results from anthropology, biology, computer science, linguistics, neuroscience, philosophy, and psychology. It challenges students to be knowledgeable in a wide variety of fields and techniques.

Cognitive science explores human, animal, and mental processes at the level of the neuron, the central nervous system, the behavior of individuals, the evolution and structure of communication and culture, as well as artificial intelligence computation, and the theory of knowledge. It is the most rapidly growing interdisciplinary arena in colleges and universities.

At the end of their program of focused liberal learning, students with an Interdisciplinary Concentration in Cognitive Studies should have a fundamental understanding of current theories concerning:

- The nature and justification of claims to knowledge including justification of beliefs and theories, and forms of rationalism, empiricism, and skepticism;
- The structure of language, symbols, and images for representing, manipulating, and communicating knowledge;
- How brains and computational systems establish memory, solve problems, form concepts, and develop understandings of the world;
- Core ideas in biology including molecular and cellular neurobiology, and receptor biochemistry.

In addition, students should demonstrate proficiency in quantitative methods for gathering empirical evidence and analyzing data, and understand the powers and limits of various representations within the controlled situations of the laboratory, or the natural situations of the everyday world.

Curriculum

A total of seven courses plus prerequisites where necessary is required:

Arts and Humanities (*two of the following*)

- LNG 201/Introduction to the English Language*
- PHL 410/Theory of Knowledge (prerequisite: one course in philosophy or permission of instructor)
- PHL 421/Philosophy of Language (prerequisite: one course in philosophy or permission of instructor)
- PHL 422/Philosophy of Mind (prerequisite: one course in philosophy or permission of instructor)

Social Sciences and History (*two of the following*)

- ANT 205/Human Evolution*
- PSY 214/Cognitive Psychology (prerequisite: PSY 101 or permission of instructor)
- PSY 311/Sensation and Perception (prerequisite: PSY 214 or permission of instructor)
- PSY 346/Cognitive Neuroscience (prerequisite: PSY 212 or permission of instructor)

Natural Science and Quantitative Reasoning (*one course from each of the following categories*)

Natural Science (*one of the following*)

- BIO 171/Human Form and Function*
- BIO 201/Foundations of Biological Inquiry*
- BIO 465/Physiology and Behavioral Ecology (prerequisite: BIO 261)

Quantitative Reasoning (*one of the following*)

- CSC 104/Human and Artificial Intelligence

Note: Any statistics course approved for the Quantitative Reasoning requirement including STA 115/Statistics, STA 215/Statistical Inference, PSY 203/Design and Analysis.

Special Focus Courses (*One course from the following*)

- BIO 480/Neurobiology (prerequisites: "BIO 201, BIO 211, and permission of the instructor")
- CSC 380/Artificial Intelligence (prerequisites: CSC 230 and 310 with grade of C or better)

European Literary Studies

Sponsors: Coordinator: H. Hustis (English); Faculty: D. Compte (World Languages and Cultures), G. Steinberg (English), J. Landreau (Women's & Gender Studies), J. Mi (English/World Languages and Cultures)

The Interdisciplinary Concentration in European Literary Studies is one of several interdisciplinary concentrations in Comparative Literary Studies. Through the systematic comparison of literary works from more than one culture or era, students of comparative

literature develop a sophisticated understanding of what literature is and how it is culturally, politically, philosophically, and sociologically defined and influenced, exploring, from a cross-cultural and interdisciplinary perspective, how and why literary texts are categorized (in terms of traditions, periods, genres and movements). Students who study comparative literature can employ the skills and information learned in their courses to supplement and further their careers in a wide range of fields, including education, law, creative writing, international business, marketing, librarianship, editing, technical writing, publishing, communications, translation, history, international studies, literature, and philosophy.

Students who complete the Interdisciplinary Concentration in Comparative Literary Studies may have also completed all the requirements for a Comparative Literature minor and, if so, should declare the minor in order to receive credit for it on their transcript.

Rationale for Concentration in European Literary Studies

Europe offers an interesting case study in comparative literature. In many respects, Europeans share a single cultural foundation, regardless of nation, religion, or language. But at the same time, Europe is the site of many conflicting ethnic groups, institutions, and traditions. A comparative examination of European literature provides an opportunity to see both the commonalities and the tensions of European culture.

In addition to courses required by this concentration, a student must complete one approved course in quantitative reasoning and one approved course in laboratory science to satisfy breadth requirements in liberal learning. Students should consult their major or open option advisors about how best to complete other liberal learning requirements.

Gender and Violence

Sponsors: J. Landreau (Women's & Gender Studies)

This concentration examines the gendered and systemic nature of violence as it is manifested in diverse ethnic, racial, sexual, national and international contexts. Students explore through courses in humanities and social sciences ways in which violence is perpetuated through interpersonal relationships and social institutions. Students integrate academic learning with applied experience through the completion of an internship in a local setting where violence and its relationships to gender are the focus. This concentration offers a focus for students pursuing studies in Women's and Gender Studies, Psychology, Political Science, Sociology, Philosophy, or Criminology.

Students should consult their major or open option advisors about how best to complete other liberal learning requirements.

Health Communication

Sponsor: J. Pollock (Communication Studies)

Health communication is an area of theory, research and practice related to understanding and influencing the interdependence of communication and health-related beliefs, behaviors and outcomes. Health communication combines both scholarship and practice. It embraces not only traditional scholarship, emphasizing theory and data collection; it also includes the use of research for broad “therapeutic” goals, using knowledge about message formation and communication to alleviate suffering or reduce risky behavior.

Messages functioning to influence health may not be intended to do so (e.g., popular culture messages may outweigh messages designed for “planned” health communication). A popular culture that imbeds demeaning “messages” regarding the treatment of women may influence far more viewers than deliberately designed messages or Public Service Announcements “planned” to increase respect for women’s rights or the dignity of women. Health communication acknowledges the influence of both planned and popularly imbedded healthy or unhealthy messages.

Humans are actors, not just acted upon; influencers, not just “targets.” A health communication perspective acknowledges that humans are not simply “receptacles,” available to receive “hypodermic needles” of information “injected” directly into human cognition and motivation. Rather, members of particular audiences or audience segments employ media for specific “uses and gratifications.” Some use media primarily for news, others for entertainment, still others for learning about new experiences and places.

In addition, audience members in turn have choices about whether to discuss what they access with others. A health communication perspective views audience members not simply as “targets” of information, but rather as “communicators” as well, part of a potential chain of “influencers.” Humans act on meanings (interpretations), not just observed “content.” A “fear” appeal may lead to cynicism and relinquishing hope, a conviction that little can be done to reduce risk. But it may also be “interpreted” not as inevitable victimization but rather as a “danger” that can be addressed and reduced through reasonable precautions. Effective health communication takes into account variations not only in message content, but also in the confidence and skill levels of audiences exposed to that content. Varied audience education levels may also lead to different interpretations of consequences of healthy behavior.

Comments on Required and Recommended Courses

- This concentration requires a minimum of seven different courses. Although some courses may be listed in more than one department or program, no course is to “count” more than once. Six courses distributed among the three sectors of Arts and Humanities, Math and Science, and Social Sciences.
- Students who follow the recommended distribution of courses (two in Arts and Humanities; two in Quantitative Reasoning and Science; two in History and

Social Sciences; plus one core course) will complete their breadth distribution in Liberal Learning.

- Students who choose not to follow the recommended distribution may, in consultation with faculty sponsors, choose to take a maximum of four courses from the same broad sector. However, they will have to complete their breadth distribution by taking additional courses for distribution outside this interdisciplinary concentration (which in some cases may be taken as part of the major requirements).

* *Courses marked with an asterisk have no prerequisites.*

International Political Economy

Sponsors: C. Fisher (African American Studies), J. Gross (History), J. Landreau (Women's & Gender Studies), B. Leven (Business), M. Lowi (Political Science), J. Mi (English & World Languages and Cultures), B. Potter (Political Science), S. Wright (World Languages and Cultures)

The concentration in International Political Economy (IPE) introduces students to an important and inherently interdisciplinary field of study. IPE examines the interaction between political and economic phenomena over time; its concerns are both historical and contemporary. To appreciate the various aspects of IPE, students take courses across four schools, thereby completing their breadth requirements prior to their more specialized study in their majors.

The requirements for the IPE concentration include one of three introductory courses: International Relations deals, necessarily, with both economic and political issues. Politics and Society in Developing Countries approaches its subject using the tools of many disciplines including history, literature and film. International Studies: Processes, Themes, and Issues is the introductory course for the International Studies major and uses history, literature, economics and political science to understand interaction among peoples over time. All three courses introduce students to topics central to international political economy.

Having learned to appreciate the value of many disciplines in the introductory course, students proceed to enhance their understanding of IPE by taking a history course, an analytic course, and an economics or business course. Knowledge of world history is essential to an understanding of contemporary politics and economics. The subject matter of international political economy and macroeconomics bears directly on the concerns of the concentration. Microeconomics and statistics are essential tools for public policy analysis. An option from the list of business and economics courses below will deepen student's analytic capacity and their substantive knowledge of IPE.

Finally, students gain some understanding of the cultural context of political and economic interaction by taking two courses in art and literature from those listed below. With the completion of a lab science, students will have pursued courses across the liberal learning categories. Furthermore, they will have gained understanding of international political economy, an increasingly important concern of informed citizens.

Law and Society

Sponsors. Tao Dumas (Political Science), N. Lasher (Business), R. McGreevey (History), T. Mahoney (General Counsel), K. Michels (Business), S. Monseau (Business), M. Roberts, (Philosophy, Religion, and Classical Studies), B. Stout (Criminology)

The interdisciplinary concentration in Law and Society would be attractive to students exploring the possibility of going to law school, but also to students interested in law, but not intending to pursue a legal education. The logic/critical thinking component of the concentration will be particularly useful to students planning to attend law school because it should help them negotiate the Law School Aptitude Test. But this component is also generally useful to students in developing the reasoning and analytical skills essential to writing clearly and speaking persuasively. The humanities perspectives provide the ethical and philosophical foundation for the study of law, while the social perspectives allow students to view law in historical, social and economic context. Finally, the law courses give students an opportunity to examine one or more substantive areas of the law. Taken together, the four main components of the Law and Society concentration form a coherent approach to the study of law, and will provide students with an interesting, integrated Liberal Learning experience.

Curriculum

Arts and Humanities (*three from the following*)

Logic/Critical Thinking (*one course*)

- PHL 120/Introduction to Logic*
- PHL 220/Metalogic (prerequisite: PHL 120 or permission of instructor)

Religious Studies

Coordinator: P. Le Morvan

Sponsors: C Chazelle (History), T. Clydesdale (Sociology & Anthropology), J. Graham (English), J. Gross (History), D. Hutton (Art), P. Le Morvan (Philosophy, Religion, and Classical Studies), M. Lowi (Political Science), L. Riccardi (Art), G. Steinberg (English), M. Tarter (English), A. Figueroa (Modern Language)

The Religious Studies Concentration at The College of New Jersey aims to familiarize students with the beliefs and institutions of major world religions, their origins and evolution in different regions of the globe and in different historical periods, their intersection with textual and non-textual forms of expression, and their profound impact on human culture and society in the past and in the present. Through courses in World Religions, students develop understandings of belief systems and institutions of individual world religions and acquire skills in comparative analysis. Courses in Religious Culture increase students' awareness of diverse cultural frameworks, particularly as they are expressed in literary, artistic, architectural, and other forms through which religious belief has been expressed in different historical periods and

regions. Through courses in Critical Issues of Religion, students gain mastery of the basic theoretical construction of religious belief and its ethical and epistemological ramifications. Courses in Social Science and History acquaint students with the historical development of religious belief and institutions; with how, over time, beliefs and institutions have interacted in both peaceful and violent ways; and with how beliefs and institutions continue to influence, and be influenced by, contemporary social and political ideologies and institutions. Through courses in all these areas, students gain skills from analysis, criticism, and research that enhance their ability to think clearly, write well, and find, analyze, evaluate, and present facts and ideas effectively. Students pursuing a Concentration in Religious Studies learn to analyze primary documents and non-textual sources (art, music, architecture, etc.) with a critical appreciation of their history, meaning, and significance to understanding historical and contemporary religious phenomena.

Students should consult their major or open option advisors about how best to complete other liberal learning requirements.

Social Justice

Sponsors: Ellen Friedman, Melinda Roberts, Christopher Fisher, Janet Morrison, Rebecca Li, Susan Ryan, David Prensky

The interdisciplinary concentration in social justice is designed to enable students interested in the theory and practice of social change to satisfy their Liberal Learning requirements. It is particularly recommended for students in the Bonner Program, but is open to all TCNJ students. The social justice interdisciplinary concentration combines course work with community-engaged learning experiences. Students opting for it must take a first year seminar with a CEL-1 component. Student may then choose from a variety of courses in the humanities and social sciences. The capstone requirement for the social justice concentration is any CEL-2 approved course. Students may also satisfy the laboratory science and quantitative reasoning requirements with any approved courses. Eight courses, including those required in natural science and quantitative reasoning, are needed in order to fulfill the requirements of the social justice concentration.

Society, Ethics, and Technology

Sponsors: D. Bates (Sociology), E. Friedman (Women's & Gender Studies), B. Leven (Economics), S. O'Brien (Technological Studies)

The interdisciplinary concentration in Society, Ethics, and Technology (SET) is designed for students who are interested in learning about the relationship between the human designed world and its impact on individuals, society, and the environment. SET principles are studied from a variety of perspectives: the design process including the application of mathematics and sciences, economics of technological activity, ethics, and the social sciences. SET is an interdisciplinary field of study that seeks to explore and understand the many ways that science and technology shape modern culture, values, and institutions, and how values shape science and technology. As citizens, consumers, workers and family members, we all depend heavily upon science and technology.

Students completing the concentration gain a balanced perspective on the importance of business and industry to economic activity and the role each individual can play in gaining control over and providing direction to sustainable technological progress. This concentration would enhance professional opportunities in many fields, e.g. high technology business management, law and public policy, engineering, and science/technology journalism

Women in Learning and Leadership

Sponsor: M. L. Hopps (Women's & Gender Studies)

Over the past several decades women have claimed leadership roles in the fields of politics, business, sports, and the professions. Consequently, women have assumed a prominent role in subverting the stereotypic gender-biased model of leadership. Although still statistically under-represented, women's increasing visibility in leadership roles continues to raise major questions: Do women have an identifiably different way of leading? How does this leadership manifest itself? What discernible effects does women's leadership have on the development and implementation of public policy? Are there differences in the ways in which women lead locally, nationally and transnationally?

This concentration examines ways in which gender bias is reflected in the perception of leadership and explores the increasing role of women in global leadership roles. Students examine differences and similarities between female and male styles of leadership through courses selected to offer a variety of examples. They also examine how those differences are reflected in local, national, and transnational cultures. Selected courses offer students a view of women as leaders in historical and contemporary settings

through the examination of literature, media, and politics; additionally students examine the cultural and social impediments to women's leadership.

Women's and Gender Studies

Sponsors: E. Friedman (Women's & Gender Studies), J. Landreau (Women's & Gender Studies)

The interdisciplinary concentration in Women's and Gender Studies offers students a unique opportunity to explore the significance of gender in personal life, history and society through a wide range of over 60 courses that span fifteen academic disciplines. The Women's and Gender Studies concentration is an excellent choice for students for several reasons. First, because of its interdisciplinary character, it exposes them to a broad range of courses from different departments. Second, the category of gender is fundamental in virtually all fields of knowledge, and thus lends an intellectual center of gravity to the exploration of different disciplines. Finally, it gives students the opportunity to gain insight into themselves and their world as it encourages them to

critically examine what often remains invisible: the ways in which gender organizes their lives, and the lives of those around them.

Specifically, the Women's and Gender Studies concentration focuses on the social construction of the meanings associated with the sexed body and its implications for the systemic organization of power in society. In WGS courses, students explore how gender shapes social roles and identities, as well as how gender interacts with other systemic identity categories, particularly sexuality, race, class, and nation.

Curriculum

Required Core (*one course*)

- WGS 200/Women, Culture and Society (no prerequisites.)

Optional Courses (five additional courses with WGS prefixes)

- At least two in the sector of Arts and Humanities
- Two courses in the sector of Social Sciences and History

Most WGS courses have no prerequisites.

In addition to courses required by this concentration, a student must complete one approved course in quantitative reasoning and one approved course in laboratory science to satisfy breadth requirements in liberal learning. Students should consult their major or open option advisors about how best to complete other liberal learning requirements.
